CERTIFIED MAIL-RETURN RECEIPT REQUESTED

Kerr-McGee Chemical Co.  
123 Robert S. Kerr Avenue  
Oklahoma City, OK 73102

RE: 68<sup>th</sup> Street Landfill, Rosedale, Maryland

Dear Sir or Madam:

As you may know, sixteen (16) parties have joined together to form the 68th Street Sites Coalition (the "Coalition"). The members of the Coalition, which are identified on the enclosed list, have pooled their technical, legal and financial resources to respond to the conditions at the 68<sup>th</sup> Street Landfill Site ("Site"). The Site, as defined by EPA, is located near the Rosedale area of Baltimore County, and consists of former disposal areas covering an approximately 270 acre area. EPA proposed the Site for inclusion on the National Priorities List in 1999 and 2003. Several members of the Coalition objected to the listing and EPA responded by deferring the listing and enrolling the Site in the Superfund Alternative Sites Program.

In 2006, members of the Coalition entered into an Administrative Settlement Agreement and Order on Consent ("ASAOC") with the U.S. Environmental Protection Agency ("EPA") to perform a Remedial Investigation and Feasibility Study at the Site. In 2008 members of the Coalition entered into an ASAOC to perform a time critical removal at the Site. To conduct this work, the Coalition retained an environmental consulting firm and it is currently anticipated that the total cost of work to be performed under the ASAOCs will cost the Coalition more than \$3.8 million, not including agency oversight expenses and administrative expenses of the Coalition. To date, \$3,000,204 has been incurred and/or paid by the Coalition for environmental consultants and other expenses in support of this effort.

The Coalition will continue to incur costs associated with the implementation of the Remedial Investigation / Feasibility Study and Reuse Assessment for the 68th Street Landfill site. The Coalition expects to submit the completed Remedial Investigation / Feasibility Study and Reuse Assessment to the EPA by late 2009. EPA currently intends to issue a (Record of Decision) for the Site by September 2010.

The purpose of this letter is two fold. First, based on information provided by the EPA and/or gathered by the Coalition, it is believed that Kerr-McGee Chemical Co. and/or its related entity Anadarko Petroleum Corp. (collectively "Kerr-McGee") is a responsible party at the above-referenced site under Sections 107(a) and 113(f) of the Comprehensive Environmental Response, Compensation, and Liability Act after 1980, as amended ("CERCLA"), 42 U.S.C. §§9607(a), 9613(f). We have included with this letter currently available information on Kerr-McGee's nexus to the Site. This letter is notice to maintain all documents relevant or potentially relevant to Kerr-McGee's liability at the Site. It is our understanding that EPA is currently investigating Kerr-McGee's liability at the Site.

Because Kerr-McGee is a liable party at the Site, it is jointly and severally liable for all response costs incurred by members of the Coalition, including pre-judgment interest, in connection with the Site and for the future costs to be incurred. The members hereby demand payment of Kerr-McGee's equitable share of these costs. Please note that this demand letter triggers payment of pre-judgment interest.

The second purpose of this letter is to invite Kerr-McGee to join the Coalition and contribute its technical, legal and financial resources to help resolve open issues at the Site. By joining the Coalition, you can contribute your fair share now and avoid pre-judgment interest and other claims at a later date. The Coalition intends to begin allocation discussions this fall, in advance of completion of the RI/FS and Reuse Assessment, and issuance of the ROD. We are inviting those parties identified on the enclosed list to join the Coalition at this time in order to participate in the allocation process and remedy decisions. The Coalition would be happy to send you a copy of its organizational agreement and the ASAOCs, and provide opportunities for you to have a position on the Steering, Technical and Allocation Committees of the Coalition.

There will be an informational meeting in Baltimore and an opportunity to view the Site on September 22, 2009. Please advise if you are interested in participating in person or by phone. If you wish to obtain further information, please contact either of us at 617-748-5500. Information on the Site is available at the Coalition website ([www.68thstreetlandfillsite.com](http://www.68thstreetlandfillsite.com)) or through EPA's website (<http://www.epa.gov/reg3hwmd/super/sites/MDD980918387/index.htm>). We have enclosed EPA's February 2009 Fact Sheet, providing updated information on the Site.

We look forward to your response. If, within forty-five (45) days following receipt of this letter, you choose not to respond favorably in writing to this letter and/or decline to participate with the Coalition, members of the Coalition will deem Kerr-McKee as a recalcitrant party and will take appropriate action at the appropriate time for the recovery of share of all costs incurred by the Coalition members, including pre-judgment interest for the amount demanded in this letter and all other expenditures related to the above-referenced site.

August 10, 2009

# 68<sup>th</sup> Street Dump Site Baltimore County, Maryland

## Superfund Update

USEPA Region 3

February 2009

### 68<sup>th</sup> Street Dump Site Investigation Status

Significant progress has been achieved since the last public meeting in May 2008. Work plans that describe the field investigation activities for the Site have been reviewed and approved by the U.S. Environmental Protection Agency (USEPA) and Maryland Department of the Environment (MDE). The field investigations began in early July 2008 and are scheduled to be completed for most of the Site by February 2009. Shortly after completion of the field investigation, a Remedial Investigation/Feasibility Study (RI/FS) Report and Re-use Analysis will be prepared to present the results of the investigation and the options for remediation and re-use of the Site.

Additionally, the Early Removal Action (ERA) was performed over the Summer and included the removal of specific containers and contaminated soils. During this activity, signs were placed prominently around the Site as requested by community members at the last public meeting. The Early Removal Action (ERA) work was completed and is under review for acceptance by the USEPA.

### Site Background

The site consists of approximately 270 acres of undeveloped area located near Rosedale in Baltimore County. The site has been divided into five Management Areas to better manage site-wide investigations, remediation and re-use (see the map below). Portions of the site were once used as landfills and received primarily industrial and commercial refuse, incinerator ash, and/or waste oils for a period of years extending from the mid-1940s through the early 1970s. The site has remained unused and undeveloped since that time except for the random dumping of surface debris by unauthorized trespassers.

In April 2006, the USEPA entered into an Administrative Settlement Agreement and Order on Consent with the 68<sup>th</sup> Street Landfill Sites Coalition (Coalition), a group of 19 companies and governments. Under the Order, the Coalition has agreed to conduct a comprehensive environmental investigation and develop a remediation plan that incorporates a preliminary re-use plan for the Site.

### Clean-up Plans and Documents

The Coalition has prepared environmental investigation work plans, a preliminary re-use assessment, and a response action document for the site. These documents have been reviewed and approved by the USEPA, MDE, the National Oceanographic and Atmospheric Administration (NOAA), and the U.S. Fish & Wildlife

Service for compliance with Superfund law and related environmental requirements.

The approved documents are available to the public. They are posted on the USEPA and Coalition websites, and may be found at:

<http://www.epa.gov/region3/hwmd/supersites/MDD980918387/index.htm>

and

[www.68thstreetlandfilsite.com](http://www.68thstreetlandfilsite.com)

The documents may be accessed through the internet available at any public library or personal computer. They may also be viewed in person at the USEPA-Region 3 offices in Philadelphia, Pennsylvania.

### Early Removal Action Completion

The ERA was performed at the Site during the Summer of 2008. It was intended to immediately reduce the human health and ecological risks posed by surface contamination and debris to on-site workers, trespassers and wildlife. The ERA focused on the removal of soils, containers, and other waste materials observed at the surface of the Site to which humans and wildlife could be exposed in the Site's current condition. The areas designated for removal were previously identified during reconnaissance conducted in March 2007 and February 2008. These reconnaissance results are presented in an USEPA-approved Engineering Evaluation/Cost Analysis Report.

The ERA was conducted in accordance with the USEPA-approved Response Action Plan over a three month timeframe between June 2008 and September 2008. Field activities included limited site clearing to provide required access; removal of surface soils (see the photograph above), containers, and housekeeping items including gas cylinders, batteries, and empty drums; and, placement of warning signs around the site perimeter. The work component most visible to local residents and the general public was the shoulder closure on the I-95 north-bound Moravia Road Exit Ramp in early Summer which allows access during the early removal action and the field investigations. The exit ramp will be returned to its original condition following the completion of the field investigation activities. Overall, the ERA resulted in the removal of approximately 44 cubic yards of contaminated soil, 3 tons of housekeeping items, 6 drums of waste materials, and the placement of 43 warning signs (the blue squares on the above map indicate warning sign locations).

### **On-going Field Investigations**

Field investigations are currently on-going to better understand and delineate environmental conditions throughout the Site. The results of the field investigation and the results of past investigations of the Site will be used to determine potential clean-up alternatives that will improve human and ecological systems that are within or pass through the Site. The field investigation activities that are currently being performed, in addition to limited clearing, include: installing monitoring wells; collecting soil borings; excavating test pits; sampling soil, soil-gas, and sediment; evaluating soil cover; and conducting bioassay sampling, geophysical surveys and a habitat survey. Additional activities will include groundwater and surface-water sampling and stream flow evaluation. In addition, off-Site sampling will be conducted to establish background. While the laboratory results are not yet available, the conditions encountered at the site are consistent with prior studies. The picture below depicts the installation of a monitoring well in Management Area F.

Over the last 6 months, Site work has been performed between 7 a.m. and 5 p.m. Monday through Friday. Access to the site by unauthorized personnel is not allowed in order to minimize the potential for exposure to waste materials and unsafe conditions. USEPA and MDE conduct periodic oversight of the field activities and receive routine status updates.

### **Completion Schedule**

Based on current expectations for completion of the field investigations, it is anticipated that the Remedial Investigations/Feasibility Studies results will be presented to the USEPA, the MDE and the Natural

Resources Trustees for review during Fall 2009. After review and finalization of these documents, the USEPA will select preferred alternatives for the Site and develop Proposed Plans for clean-up. The Proposed Plans will be made available to the public for review and comment. It is expected that the comment period, along with a public meeting on the RI's/FS's, will be held in Spring 2010.

### **When is the Next Community Involvement Opportunity?**

Opportunities for interested community members to provide input to the clean-up and redevelopment process are available on a continuing basis by contacting the USEPA Community Involvement Coordinator (Carrie Deitzel), listed below. In addition, informal public information sessions and required public comment periods will be held at key project milestones. The next public information session is tentatively scheduled for Spring 2009 to discuss the overall findings of the field investigations. Additionally, USEPA will conduct interviews with community members through March 2009 to help the USEPA understand local issues and concerns regarding the site and its clean-up.

Public notices of upcoming events, including public information sessions, will appear in *The Avenue*, a weekly newspaper, and *The Examiner*, a daily newspaper. Direct mailings will also be sent to those on the most current USEPA mailing list. Site-specific information will be available on the USEPA website.
